### What's New in the?

Windows XP and later: Save a snapshot of your screen to file/image. Windows Vista, Windows 7 and Windows 8: Save a snapshot of your screen to file/image. Windows 95, Windows 98 and Windows Me: Save a snapshot of your screen to file/image. Select a hotkey to capture screen Edit Settings Determine the method you want to capture the screen. You can choose: Hotkey: Want to record hotkey controls? ScreenCapture WPF is the best solution. Region: You can draw a region on your screen. Active window: Capture the active window. Highlight object: You can highlight a region, file, website URL, etc. Complete screen: If you press Screenshot + Scroll Lock, it will capture the screen and scroll bar as well. Save to file/image: Save the captured screen to one or more images. System tray: After the ScreenCaptureWpf application is closed, a notification window will be displayed in the system tray. How to use hotkey: You can assign a hotkey (Ctrl + Alt + PrintScreen) to click the 'Capture screen' menu item in the application interface. You can also create a hotkey programmatically like this: 

```
private void OpenScreenCaptureWPF() { ToolTip tt = new ToolTip(); tt.ToolTipTitle = "Record Hotkey to Capture Screen"; tt.Icon = new Icon("c:\\images\\CaptureScreen.ico"); tt.ShowAlways = true; tt.Show(this.Controls.Find("captureButton", this)[0], this); }
```

 1. Press Ctrl + Alt + Print Screen on your keyboard and keep it pressed. 2. When the application is launched (or opened by the mouse), the Capture Screen feature is enabled and will be enabled by default. 3. To record a hotkey combination, click on the Capture screen menu item. 4. When you want to stop recording a hotkey, click on the Capture screen menu item again to disable the capture function. For more information about how to use hotkeys, please refer to this link. Support Monitor On Windows Vista and Windows 7, you will be notified about the following messages in the taskbar. Scenelock warning:

---
